EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Reasons for allowance

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest a variable optical attenuator for attenuating optical signals transmitted from an input fiber to an output fiber comprising a refractor fixed on a rotatable mechanism for deflecting light beams from the input optical fiber to couple part of the light beams into the output fiber; wherein the rotatable mechanism is mounted on a holder coaxially fixing the input and output ports and the rotatable mechanism is rotated about an axis perpendicular to an optical axis of the input port as recited in claims 1 and 10; further wherein the refractor extends perpendicular to the axial direction, light from the input GRIN lens penetrates the refractor and fully enters the output GRIN lens when the refractor is tilted to the axial direction with an angle different from ninety degrees, attenuation occurs as recited in claim 8.

The examiner agrees with applicants' arguments on pages 6-8 in the remarks accompanying the amendment of August 8, 2003, and fully concurs that the Bergmann and Pan et al. references do not disclose or suggest the highlighted limitations above.

Claims 1-15 are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
